

# ArcGIS Pro vs. ArcMap

We're all screwed

# Disclaimer

- I'm not an ArcGIS Pro pro.
- I'm not an ArcMap pro.
- I'm not a computer pro.
- I'm not a PowerPoint pro.
- I'm not a presentation pro.
- Enjoy!

# Abstract

- ESRI has announced that its newest ArcGIS Desktop application, ArcGIS Pro, will eventually replace ArcMap. Although they will continue to support and maintain ArcMap, ESRI will be focusing their development efforts towards ArcGIS Pro moving forward. This presentation will give a high level overview of what differences exist between the two applications (so far), and what steps we've taken to begin preparing for the switch from ArcMap to ArcGIS Pro.

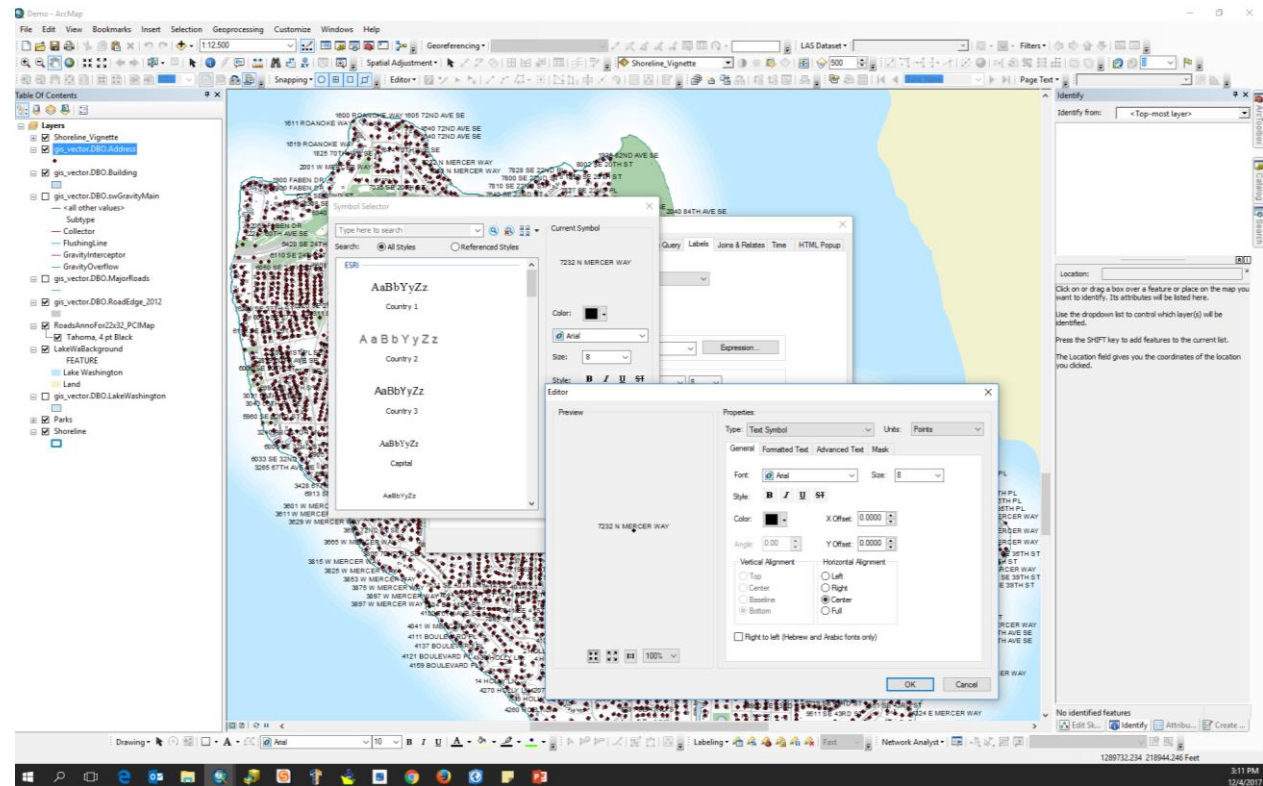

# ArcMap

## Pros

- Familiar
- Powerful
- IT JUST WORKS

## Cons

- Clunky
- Slow/not optimized

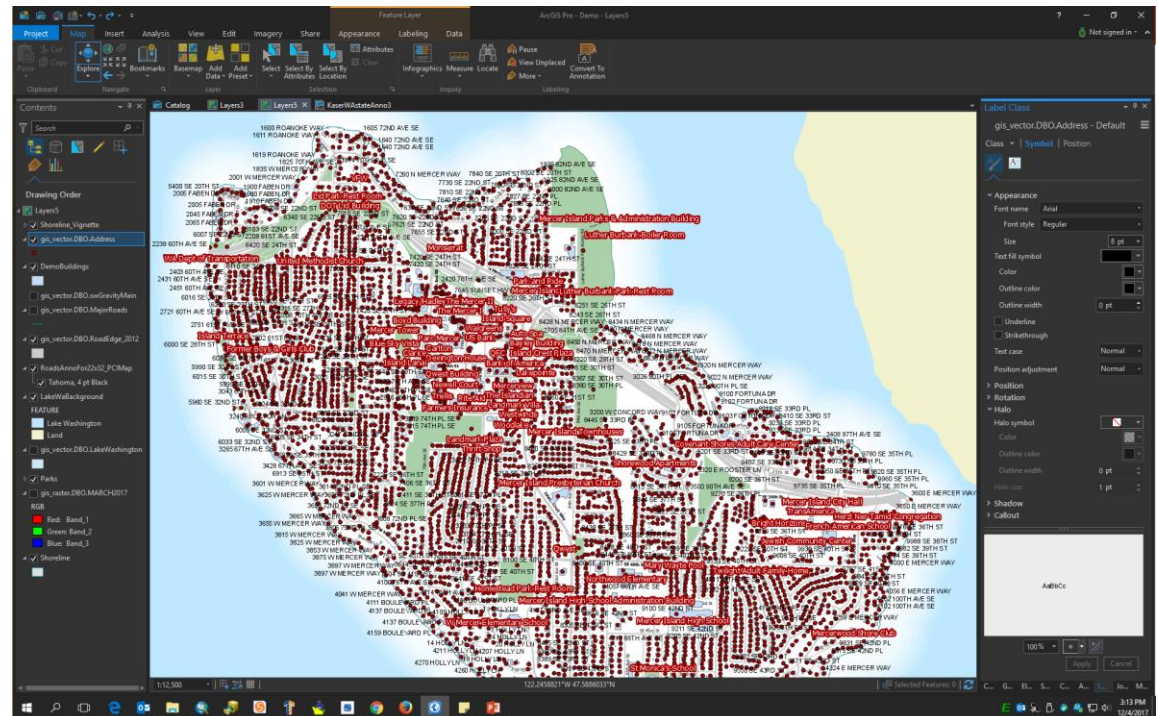

# ArcGIS Pro

## Pros

- Fast and shiny
- Multiple linked layouts and displays
- QoL improvements
- 3D

## Cons

- Need to learn new workflows
- Lacking some tools

# Same same (but different)

- Project-based workflows in ArcGIS Pro
- Ribbon UI
- Edits can be saved automatically
- Table editing
- Map template vs project template
- M E T A D A T A

# Demos

- Basic map creation
- Cartography
